I think Patrick Tursic really knows what heâ™s talking about. The strategies and tips described in

this book make logical sense but he explains how they work anyway. This grinder's guide is a great resource for anyone looking to up their fantasy basketball game from beginner to advanced. I got a lot out of his section on the general lineup composition and how you should change your strategy based on the different types of games you encounter. You will definitely have a deeper knowledge of the best fantasy basketball tactics after reading this book cover to cover.

Includes some general good advice for beginners, but if you've been playing a while you'll know most of this. The main problem that I have with this book is that, although the topic is supposedly on grinding, the main example that he builds up to is the one time that he won big, which isn't really the purpose of the book. The main example at the end should be replaced with more grinding examples. Also, overall, the strategy nets you very, very, very little cash. I mean very little. The author recommends head-to-head games (and 50/50s, but he seems to favor the H2H games). Remember that the sites take a small cut of H2H games, so if you play a \$1 game and win, you don't win \$1, rather 80 cents. He says that he wins 60 or 65% of those games on most days, so you have to subtract all of your losses as well. Do the math and you'll realize just how extremely little this is (and this assumes that you don't have any bad days--if you have just one bad day and lose \$10 or whatever, it might take you a week to make it up with this system, during which time you could have another bad day). Even if you take "safe" players, sometimes they get scratched last minute for whatever reason--this is particularly a problem on FanDuel because you can't alter your lineup once the competition starts (you can do it on DraftKings--FanDuel really needs to change that). Overall--of course the strategy in this book is fairly safe. You won't lose much. But I think "grinding" is an understatement, because even with excellent play you'll be lucky to bank much. Sorry, just my honest opinion after having played on my own and tried the methods with mixed success.

One of my go-to guys for Fantasy Sports, this book will really help you, no matter if you are new to the game, or an experienced Veteran. Something here for everyone! With DraftKings and many of the 1 day leagues on the rise, this will help you get closer to success!

The author gives the REAL truth and explains how difficult it is to win big tournaments. Money to be made comes from hard research and the slow grind of day to day games. He shows how he put together his lineups and the reason for his selections.

As a daily fantasy sports player I was looking for a good book on daily NBA and I found it with this one. Pretty much everything is covered. Choosing a DFS site, the different roster and scoring rules. Coming up with lineups for all the different game types (cash games, GPPs). The section on research was extremely helpful as was the last chapter that dissected a winning GPP lineup and the thought process that went into generating it. It's an excellent read for any daily fantasy basketball player. Highly recommended.

An excellent source of information. The author is very honest about winning money in daily sports fantasy. The DFS strategies are simple and logical.

Good insight and great for people just getting started in daily fantasy sports...

Great book for a beginner in DFS. I found it to be a quick read and won my first \$5 double-up with his advice. I would actually call it a must read for beginners.
