Customer Reviews

As an infrequent sports bettor, I've often been left scarred and wounded by my experiences, but my losses haven't dissipated my enthusiasm for sports betting. So, I was fascinated by the Z-Code system when I first heard of it. A couple of my friends have made big profits using this system to place their bets. This book, Z-Code Sports Investing Bible, written by Trey Richards and a team of

Z-Code system's expert handicappers, explains why this is so. For the first clue, notice the word "investing", rather than "betting". Z-Code system invests, rather than gamble with your money. There is no room for thrill seekers here. These guys are serious professionals. The writer talks of the psychology and thinking of a successful sports bettor "conservative and consistent. A detailed spreadsheet based money management plan is discussed. The expert handicappers elaborate at length on 5 expert systems from Z-Code, including the highly popular Z-Code Oscillator. These make for heavy and intense reading, but well worth the effort, considering the potential rewards of mastering them. But what I personally really liked most about the book was the chapter on 9 common myths and mistakes made by sports bettors "which explains my own abysmal performance so far. I conclude the review by discussing the wisdom gained by me from this chapter.

1. Win Rates "According to the writers, high win rate is a scam used by handicappers to lure susceptible bettors. The writers explain this with concrete examples why a high win rate doesn't always mean high profit.
2. Short term goals vs Long term goals "Chose the latter. All or nothing never works.
3. The "fix" - forget about it. No longer an issue in professional sports where athletes get incredibly huge salaries.
